That sounds like a good plan given the time available.

That does sound like a better (and more efficient) plan.

Tom, Mary, Julie, Theresa, and Kathy,

I spoke with Marc over the break at the conference. We concur with Tom about the potential issues that could result by bringing in a lot of folks who haven't previously been involved with the review of oil and gas projections. We want to reach a more targeted audience, otherwise we could end up with a less productive call.

Thus, we propose to prepare an agenda for the call and forward it to the RPO leads for them to distribute to the appropriate contacts at their states. In this way we hope to reach the affected parties, but not those who haven't been involved previously in the emissions reviews.

I'll work on preparing the agenda. If anyone has concerns about this approach, please let me know.

Alison

**Subject:** RE: Setting up call on new 2023 oil and gas projection factors and emissions

Tom,

Yes, I touched base with Kathy this morning and she thought the list would be OK to use. However, it sounds like you have some concerns about that list because much of the group hasn't been involved with projections previously. It's primarily the folks that have been giving input to the modeling process that we are trying to reach.

I agree that we need to get an announcement out very soon – I was hoping to do that today. I'll try to catch Marc this afternoon to get his suggestion on the best approach.

**Subject:** RE: Setting up call on new 2023 oil and gas projection factors and emissions

Hi, Alison - thanks for sending this note of clarification.

My perception is that you see this as "EPA's call" as you say will utilize other contact lists.

We have a well-organized, planned-well-in-advance approach set up for the 100+ people invited to NOGEC calls. As I mentioned yesterday, looking back at least a year, there's been no previous outreach to the NOGEC on the O&G projection effort by EPA. It'll be a cold start for many on the NOGEC list.

So I've copied the others on the NOGEC Steering Comm. (Jennifer, Julie, Theresa, and Kathy).

Although the EIC is going on for you, Julie, Jennifer, and me - a "hold the date and time" E-Mail is something to be done, even if agenda and content are not yet clear. Short notice for all of us, to be sure.

In the spirit of collaboration...

Tom Moore
